PROFESSIONAL EXPERIENCE

Software Developer, Aryan Imaging & Business Consultants Pvt. Ltd. 05/2024 – Present

Tech Stack: Python, Microsoft Azure, Flask, Microsoft SQL Server, Regex, JSON, Microsoft Power Automation.

- Extracted and processed invoice data from over **1,000 invoices** monthly using **Microsoft Azure Document Intelligence, Kubernetes**, and **MLOps** practices, deploying containerized applications and achieving **98% accuracy**. Reduced manual processing time by 80%, enhancing overall efficiency by 50% through robust data quality assurance practices and **DevOps** practices.
- Automated report generation in **XLSX** and **CSV formats**, producing 50+ reports weekly and saving approximately 20 hours in manual reporting for **data analysis**, thus improving business requirements fulfilment.
- Deployed **robotic process automation** with **Python** and **Microsoft Power Automate** for SAP, which resulted in a 50% reduction in manual processing time for document handling tasks, leveraging **cloud-based** solutions for efficiency.

SKILLS

- **Programming Languages:** Python, Flask, PyQt5, C++, C.
- **LLMOps:** RAG, LLMs (GPT, LLaMa), Vector Search (Weaviate, FAISS), Embeddings, Semantic Search, Agentic AI
- **GenAI & LLMOps Stack:** LangChain, RAG, Transformers, Prompt Engineering, OpenAI API, Weaviate, vLLM, MLflow
- **ML Libraries/Frameworks:** TensorFlow, Scikit-learn, OpenCV, Matplotlib, XGBoost, Pandas, Numpy.
- **Databases:** MySQL, Microsoft SQL Server, Google Cloud Platform (GCP), Firestore, Schema, Vector Database.
- **Tools & Operating Systems:** PyQt5, PowerPoint, Linux (Ubuntu), Jupyter Notebook, VS Code, PyCharm.
- **Additional Skills:** Version Control (Git, GitHub), RPA, GitLab CI/CD, Linux, Object-Oriented Programming (OOP), Unity 2D (Game Development), Figma (Design), Articulate Communicator, Agile Methodology.

PROJECTS

AI-Powered Document Data Extraction System

- **Built an AI-driven Flask web application** utilizing **Azure Document Intelligence** to extract structured data from scanned documents (invoices, forms), automating a previously manual process and achieving **80% reduction in processing time**.
- **Integrated Azure's prebuilt and fine-tuned models** to extract and classify **10+ key fields** (e.g., invoice number, date, amount) with over **95% extraction accuracy**.
- **Developed Python-based backend logic** for real-time validation, data cleaning, and error handling, reducing data inconsistencies by **70%**.
- **Designed an intuitive, user-centric UI** to support document upload and display of parsed results in structured tables, enhancing overall usability and efficiency by **40%**.

RAG-Based Document Search Demo

- Developed a **Retrieval-Augmented Generation (RAG)** based document search application integrating OpenAI APIs with Weaviate **vector database**.
- Implemented **hybrid search (combining semantic and keyword search)** in Weaviate, enhancing retrieval relevance by balancing exact matches with semantic similarity.
- Established a **Flask API** to fetch top-k contextually relevant document chunks and pass them to **OpenAI GPT-3.5** for final answer generation.
- Achieved 90%+ context precision, significantly improving document-based question answering performance over traditional keyword-only approaches.

EDUCATION

Master's Certification in Data science and Artificial Intelligence,
Indian Institution of Technology Roorkee

05/2025 – Present

Bachelor of Engineering in Computer Science and Engineering,
Dr. Babasaheb Ambedkar Marathwada University Sambhajinagar.

05/2019 – 05/2023
